

## Coretechs Capabilities

Coretechs is your partner in building custom software that fits your operations. Whether you need mobile apps, backend systems, or integrated platforms, we combine modern technology with hands-on expertise to deliver efficient, user-friendly solutions — tailored to your needs.

We specialize in creating end-to-end digital platforms that solve real operational challenges. From idea to deployment, our team works closely with clients to understand workflows, design intuitive user experiences, and build scalable systems that grow with your business.

### Some of Our Technologies?

Development	
Python, Django, Flask PHP, WordPress, Laravel, Drupal, Yii Coldfusion, Elixir	.NET, Classic ASP Java, Grails, Kotlin Vue, React, Angular, Node
Database & Hosting	Native Apps
MySQL, Postgres, SQL Server AWS, Azure	IOS and Android Swift, Objective C, Java, React Native

### Some of Our Solutions?

- **Custom web solutions:** Web That Works – From new websites and web apps to full revamps of legacy systems.
- **Full-stack applications: Web & Mobile, Together** – Dynamic web platforms built alongside iOS and Android apps in React Native, enabling one unified team to manage both front-end and back-end development.
- **Mobile app expertise:** Apps That Scale – Native and cross-platform apps (iOS, Android, React Native) across use cases such as e-commerce, productivity, and enterprise, built to integrate with client infrastructure.
- **Seamless integrations** – Connecting commercial off-the-shelf (COTS) products with new or existing systems for maximum efficiency.
- **Creative design services: Design That Engages** – Custom website design, UI/UX mockups, and user-focused digital experiences.
- **Built for You** – Custom software and internal systems designed from the ground up.

**When you are ready to proceed,**
